police and communities together

SATELLITE NAVIGATION EQUIPMENT

Don't lose your satellite navigation equipment to car thieves.

- With satellite navigation equipment becoming more popular, it is also becoming popular with criminals.
- Where it is portable keep it safe by taking it together with the support cradle and suction pads, with you.
- Remember to wipe away any suction marks left on the windscreen or dashboard as thieves will look for these.
- Don't leave the equipment in the glove compartment.
- Mark your equipment with your postcode, house number or registration number.
- Make a note of the make, model and serial number. Keep a note of this somewhere safe - but not in the car.
